

We're happy to announce that as of May 18th Nordlie's Family Dentistry will re-open to treat all our patients!

We already, as a daily practice, assure universal precautions as outlined by CDC and WISHA standards of infection control. Our high standard of care ensures that your trust and safety are never compromised.

You'll still receive the same great service from our dedicated team, however to ensure the safety of all our patients we've implemented the following additional protocols:

- In compliance with the recommendations for public health, anyone with a cough or fever will not be allowed in the building and should stay home. We will be happy to reschedule your appointment for a later date.
- Before your appointment, you have the option to stay in your car instead of the waiting room until we're ready to seat you in your personal operator. Simply call us when you arrive, and we will let you know when we're ready for you.
- Upon entering the office, you will have your temperature taken and sign a health release form.
- Medical grade air cleaners have been placed throughout the office.
- In addition to face masks, face shields will be used by staff during patient treatment.
